**++Ministry of Bulgaria awards INTRASOFT International a 2.75 MEURO customs project ++**

INTRASOFT International, a subsidiary of Intracom IT Services, in cooperation with VEREO and Intracom IT Services has undertaken the implementation of the EU Excise Movement Control System (EMCS) for the Ministry of Finance of Bulgaria. The total value of the project is € 2.75 million, while INTRASOFT's participation amounts to 1 . 65 m. The project will be completed in 1 year.

EMCS is part of the vision of a truly integrated Customs union between all EU Member States which allows for an immediate flow of information between National Customs Offices, assisting thus Member States to limit fraud and facilitating them to increase income from excise products.

The implementation of the Bulgarian EMCS will be based on the **X-EYES** solution mutually developed by INTRASOFT International and IBM. After the implementation of EMCS the Bulgarian Customs will be able to:

receive electronically declarations from Bulgarians Traders

inform other EU countries on excise shipping movements from Bulgaria to any other EU Member State and

be informed by other EU Customs Offices on excise movements towards Bulgaria .

In the field of Custom solutions, INTRACOM IT Services Group and especially INTRASOFT International has a leading European position. Since 1997 has carried out the implementation of the largest trans European custom systems by implementing solutions in most European countries.

###

**About INTRASOFT International**

INTRASOFT International was established in 1996. The company is a subsidiary of Intracom IT Services, a member of Intracom Holdings Group. Today the company is established as one of the primary IT services providers in the European Union. Its customer list includes almost all E.U. Bodies as well as the majority of the General Directorates (DGs) and Agencies of the European Commission. The company offers a wide range of mission critical IT services and systems covering the inception, realisation, operation, and support of specialised business domains and diverse technical environments. The majority of those undertakings support the EU Central Administration needs and implement EU policies and directives in coordination with the

EU Member-States and other countries.
