PRESS RELEASE

IDEôs Hybrid Tactical Mobile Generator in ñSpring Stormò 2017

Koropi, Greece, June 21st, 2017: IDEôs (INTRACOM Defense Electronics) latest product technology was put to test by the Estonian Defence Forces (EDF) during the ñ15th Spring Stormòexercise.

IDEôs pioneering tactical mobile Hybrid Power Station was tested during the exercise, primarily focusing in its performance for significantly reduced fuel consumption and maintenance requirements and also for its unique operational capability to provide power under True Silent Watch, during covert operations.

The Hybrid Electrical Power System (HEPS) product family is the result of IDEôs substantial research and development activity in the field, offering power supply solutions for stationary and mobile applications, as well as customized integrated solutions for military vehicles. HEPS optimise power availability at the minimum running cost, utilising intelligent power management and storage techniques, reducing dramatically downtimes and ensuring that power can be available on demand for hours without thermal or aural trace.

In the Estonian exercise ñ15th Spring Stormò, which took place between 8 and 25 May 2017, participated 9,000 military personnel of the EDF, from NATO member-countries as well from other countries such as Canada, Denmark, Finland, France, Georgia, Germany, Latvia, Lithuania, Netherlands, Poland, Sweden, Ukraine, UK and USA as well as air forces from Belgium, Poland, Spain and USA.

About IDE

IDE, Greeceôs leading defense electronics and communication systems provider, is a subsidiary of Intracom Holdings, one of the largest multinational technology groups in Greece. IDE possesses unique know-how in design, development and manufacturing of products that incorporate state-of-the-art technology in tactical military communication systems, encryption devices, command, control and communication systems (C³I), surveillance, reconnaissance and security systems, hybrid electric power and electric energy storage systems, missile data links and electronic components, software for military applications and testing equipment.

IDE participates in international development and production programs, as well as in international cooperations for the production and export of defense equipment and is a registered member on NATOôs vendors list. The Companyôs products and services are deployed in Cyprus, Finland, France, Germany, Lithuania, Luxemburg (NATO/NSPA), Sweden, UK and the USA.
